REAL ESTATE MARKETPLACE

Wisteria Properties

1. Project Overview

The objective is to develop a **scalable, secure, and high-performance real estate marketplace** that connects **buyers, sellers, landlords, tenants, agents, and developers** on a single digital platform. The platform will support **property discovery, listing management, lead generation, communication, analytics, and monetization**.

---

2. Core User Types (Roles)

1. **Guest Users (Visitors)**
2. **Registered Buyers / Tenants**
3. **Property Owners (Individuals)**
4. **Real Estate Agents / Brokers**
5. **Builders / Developers**
6. **Admin / Super Admin**

Each role will have **role-based access control (RBAC)**.

---

3. Information Architecture (High-Level Modules)

1. Public / Visitor Module
2. User Authentication & Profile Module
3. Property Listing & Management Module
4. Advanced Search & Discovery Module
5. Lead Management & Communication Module
6. Agent / Builder Dashboard
7. Monetization & Subscription Module
8. Location, Maps & Geo Module
9. CMS & Content Module

10. Admin Control Panel
11. Analytics, SEO & Marketing Module
12. Security, Performance & Compliance Module

---

4. Detailed Module-Wise Functionality

4.1 Public / Visitor Module

Purpose: Property discovery & lead initiation

Features:

- Home page with city-wise property search
- Buy / Rent / Commercial / PG segmentation
- Featured properties & sponsored listings
- Popular localities & trending searches
- Property price trends & insights
- Static pages: About, Contact, FAQs, Privacy, Terms
- Blog & guides (buyers/sellers)

4.2 User Authentication & Profile Module

Features:

- Signup / Login (Email, Mobile OTP, Social login)
- Forgot password & account recovery
- User profile management
- Role selection (Buyer / Owner / Agent / Builder)
- Saved searches & favorite properties
- Viewed property history

4.3 Property Listing & Management Module

For Owners / Agents / Builders

Property Types:

- Residential (Flat, Villa, Plot)
- Commercial (Office, Shop, Warehouse)
- Rental / Lease / PG

Features:

- Add / edit / delete property listings
- Multi-image & video upload
- Floor plans & brochures
- Property attributes (BHK, area, price, amenities)
- Location tagging with map
- Property status (Active, Sold, Rented)
- Duplicate listing detection
- Draft & preview mode

4.4 Advanced Search & Discovery Module

Core Differentiator

Features:

- City → Locality → Project-based search
- Filters:
  - Budget range
  - Property type
  - BHK
  - Area (sq.ft)
  - Possession status
  - Furnishing
  - Amenities
- Keyword-based smart search
- Map-based property search
- Sort by relevance, price, date, popularity
- AI-powered property recommendations (Phase 2)

4.5 Lead Management & Communication Module

Features:

- Enquiry forms on each property
- Instant call / WhatsApp CTA
- Lead routing to owner / agent / builder
- In-dashboard messaging system
- Email & SMS notifications
- Lead history & follow-up tracking

4.6 Agent / Builder Dashboard

Features:

- Dedicated dashboard per agent / builder
- Portfolio & brand profile page
- Bulk property upload (CSV / Excel)
- Team member access
- Lead analytics & conversion tracking
- Subscription & billing overview

4.7 Monetization & Subscription Module

Revenue Models:

- Paid property listings
- Featured / highlighted listings
- City-wise premium exposure
- Agent subscription plans
- Builder project promotion packages
- Banner & native ads

Features:

- Plan management
- Usage limits (leads, listings)
- Online payments (Razorpay / Stripe)
- Invoice & GST support
- Auto-renewal & expiry alerts

4.8 Location, Maps & Geo Module

Features:

- Google Maps / Mapbox integration
- Nearby amenities (schools, hospitals, metro)
- Distance & commute estimation
- Locality-level insights
- Geo-based search suggestions

4.9 CMS & Content Module

Features:

- Blog & article management
- City & locality landing pages
- SEO-optimized content blocks
- Media library
- Dynamic FAQs

4.10 Admin Control Panel

Super Admin Capabilities:

- User & role management
- Property approval & moderation
- Reported listing handling
- Subscription & payment control
- Content moderation
- System configuration
- Access logs & activity audit

4.11 Analytics, SEO & Marketing Module

GIGANTE

Features:

- Google Analytics & Search Console integration
- Property performance metrics
- Lead funnel analytics
- City & locality SEO pages
- Schema markup (Property, FAQ, Breadcrumb)
- CRM & marketing automation integration

4.12 Security, Performance & Compliance Module

Security:

- Role-based access control
- CAPTCHA & spam protection
- Secure payment handling
- Data encryption
- WAF & malware monitoring

Performance:

- CDN integration
- Image optimization
- Caching & lazy loading

Compliance:

- GDPR
- Cookie consent
- Data retention policies

---

5. Technology Stack (Suggested)

- **Frontend:** React / Next.js
- **Backend:** Node.js / Laravel
- **Database:** MySQL / PostgreSQL
- **Search Engine:** ElasticSearch
- **Hosting:** AWS / GCP

GIGANTE

- **Maps:** Google Maps API
- **Payments:** Razorpay / Stripe

---

6. Development Phases & Timeline

Phase	Duration
Discovery & Wireframing	2 Weeks
UI/UX Design	2 Weeks
Core Development	8–10 Weeks
Testing & QA	2 Weeks
Launch & Monitoring	1 Week

---

7. Future Enhancements (Phase 2)

- AI price prediction
- Virtual property tours
- Chatbot for property discovery
- Mobile apps (Android / iOS)
- CRM for enterprise brokers

8 . Conclusion

This architecture ensures:

- High scalability
- Strong monetization
- SEO dominance
- User trust & engagement

The platform is designed to evolve from a **listing portal** into a **full real estate ecosystem**

GIGANTE

What this document covers

- End-to-end **website architecture**
- Clear **user roles & access control**
- **Module-wise functionality** (visitor, buyer, owner, agent, builder, admin)
- Advanced **search, maps & discovery logic**
- **Monetization models** (subscriptions, featured listings, ads)
- **Security, scalability & performance** considerations
- Suggested **technology stack**
- **Development phases & timelines**
- Phase-2 enhancement roadmap (AI, virtual tours, mobile apps)
